Settings

Crown 3 positions

First position

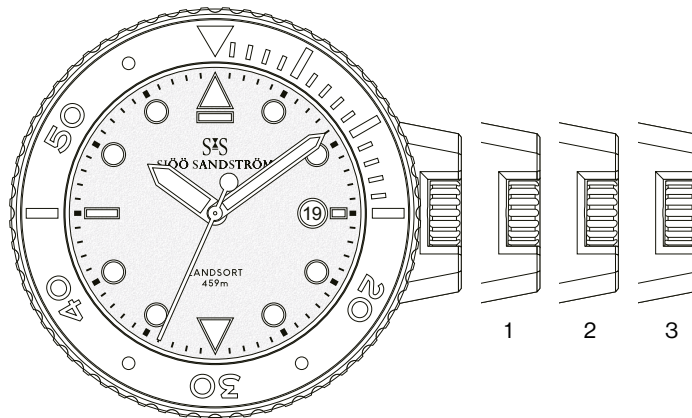

This position allows you to wind up your watch manually. This watch is selfwinding by the movements of the wrist.

Second position

Turn the crown counter-clockwise to correct the date.

Third position.

Turn the crown counter-clockwise setting the time. Remember to always push the crown back to position 1 and tighten the screw clockwise back to final position 0. Always have the crown in position 0 while submerged under water.

Service

We recommend you to get a regular service every 4 to 5 years at an authorized service center to keep your Sjöo Sandström watch in good condition. Check the water resistance of your watch every 12 months.

Everyday maintenance

All Sjöo Sandström watches are water-resistant. Before swimming, make sure that the crown is fully screwed down. After swimming in saltwater, rinse your watch in fresh water.

For watches with a metal strap: rinse with warm water regularly and dry with a soft cloth.

Avoid dropping your watch onto hard surfaces and exposing it to excessive stress. Magnetic fields can affect the balance-spring in watches with mechanical movements, please avoid frequent exposure to magnetic fields.

Warranty

Every Sjöo Sandström wristwatch is hand assembled with the purpose of functioning perfectly from the day of purchase and for a long time to come. This two year international warranty covers any defects in the material and workmanship of your watch at the time of delivery.

To validate Your warranty, the enclosed international warranty card must be dated and stamped by an official Sjöo Sandström retailer at the time of purchase.
